Andris Broks – Seminar

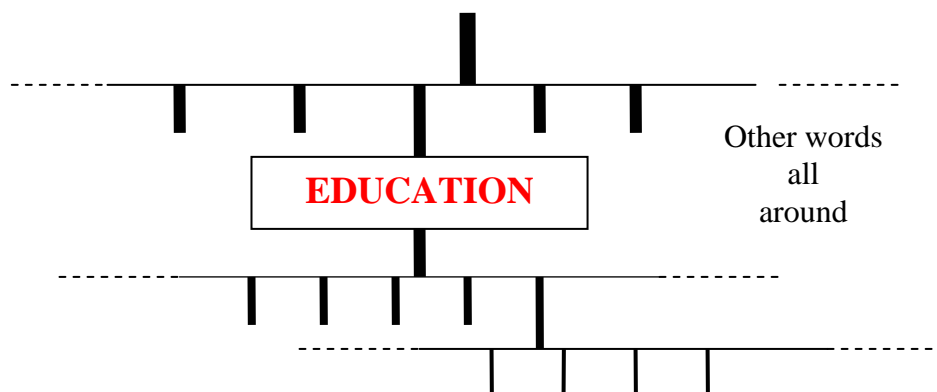

*Invitation to Systemology of **Education***

Hello, I am uncle ANDRIS from the University of Latvia !

What do you feel as a Czech student when hearing the word "EDUCATION**" ?**
What is more or less precise definition of this concept expressed in Czech language?

Describe, please, these feelings, using English words and grammar – speaking International English Czech version! Then try to translate in English language Czech definition of corresponding concept **EDUCATION**, accepted in the Czech Republic - but do not copy-paste definitions given by original English people or by people in other countries! Demonstrate your native Czech understanding as well as comprehension of this word as a definite concept !

In Latvian there is a corresponding word “IZGLĪTĪBA” and I will tell you about the meaning and definition of this word as concept a bit later. Your answers are coming first!
By the way – I hope that you already have a special study material about the systemic research and development of the concept “**EDUCATION**” in Latvia.
