2 topic: INTEGRATED SCIENCE EDUCATION IN THE CONTEXT OF THE CONSTRUCTIVISM THEORY

Main purpose:

The main objective is to discuss the issues of integrated natural science education by applying a constructivist approach.

Questions for self-preparation and later discussions:

- What is it contemporary constructivism?
- Have you some ideas?
- What are the qualities of constructive science teaching and learning?
- Why is it difficult for teachers to work in constructivist teaching/learning environment?
- What are the main theoretical statements related to this topic?
