3 topic: THE MAIN CHALLENGES AND TRENDS IN SCIENCE EDUCATION

The main purpose:

The main purpose is to discuss the key challenges for natural science education and also some future trends (development policy).

Questions for self-preparation and later discussions:

- What are the main natural science education research trends in the Czech Republic?
- What scientific researches have been conducted in your university recently? Do you know this?
- How can you assess your knowledge and understanding of the constructive science teaching/learning?
- How do you understand the relationship between instructivist and constructivist approach in science education area? What is the right balance?
