## 4 topic: CONTEMPORARY SCIENCE EDUCATION ISSUES IN LITHUANIA

## The main purpose:

The main objective is to discuss issues of quality of natural science education in Lithuanian comprehensive schools and to make a comparison with educational system in Czech Republic.

## Questions for self-preparation and later discussions:

- What is the physics course (biology, chemistry) structure in the upper secondary schools in Czechia?
- How the science curriculum is constructed in general?
- What is the structure of science education competence in upper secondary schools in Czechia?
- What is the student evaluation system?
